INTRODUCTION

Swakarya is a Web-based Wedding Photography Booking System that are designed for a modest photographic company named Swakarya Studio specialized in wedding photography. This system is intended to fulfill the needs of Swakarya clients and the administrator. Furthermore, the system is built with some of the core booking feature to ensure an organized booking system that can alleviate the effort of one-person job.

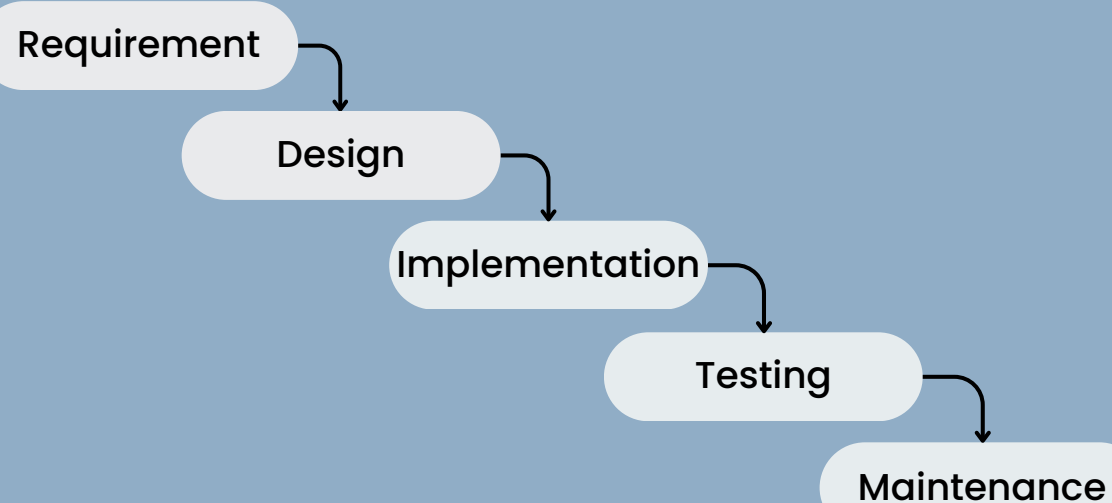

PROBLEM STATEMENT

-  Ineffective identification of date availability
-  Incapability of social media platform to assure a successful booking
-  Inefficient manual booking

OBJECTIVES

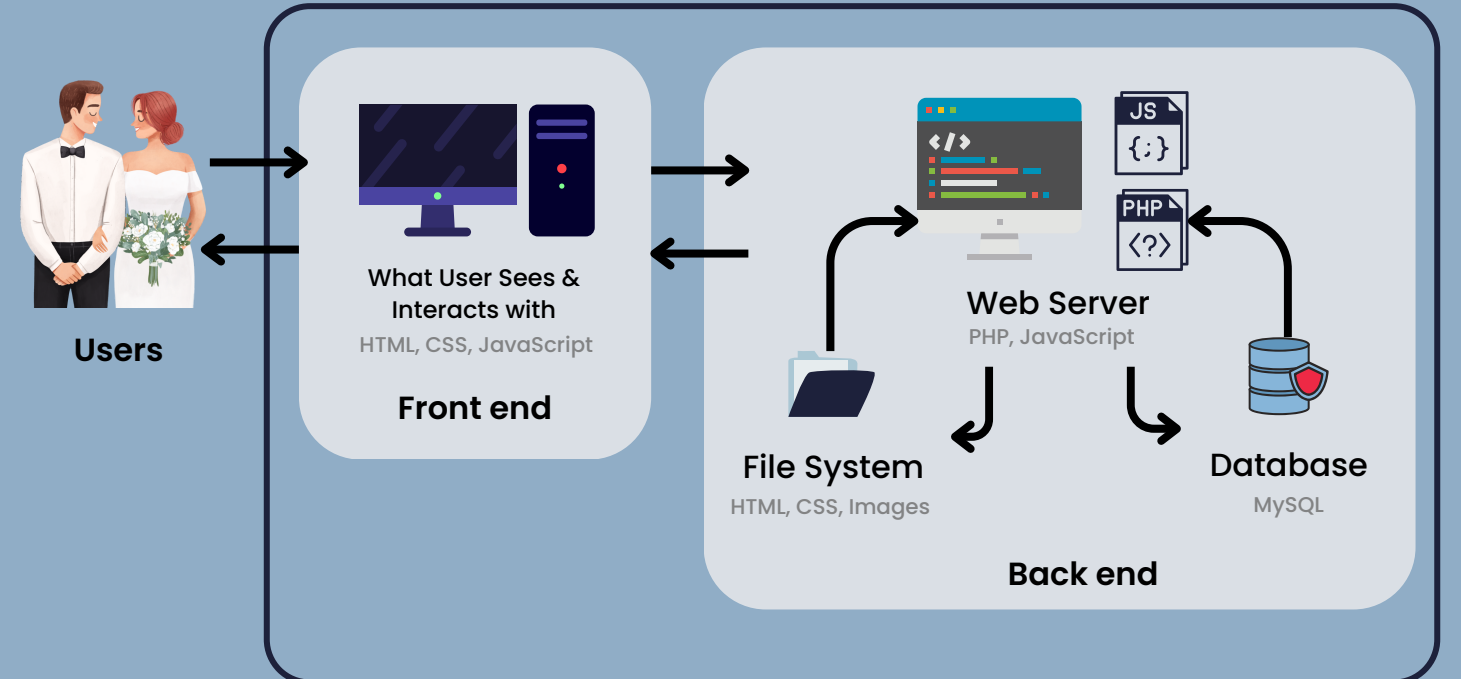

-  To analyze the existing web-based systems for wedding photographer and other similar systems on the market that include a booking feature.
-  To create a more efficient system by designing and implementing booking and uploading features into the Swakarya booking system.
-  To integrate several modules into Swakarya booking system for the uses of the user and company.
-  To validate the system by performing system and user acceptance tests.

METHODOLOGY

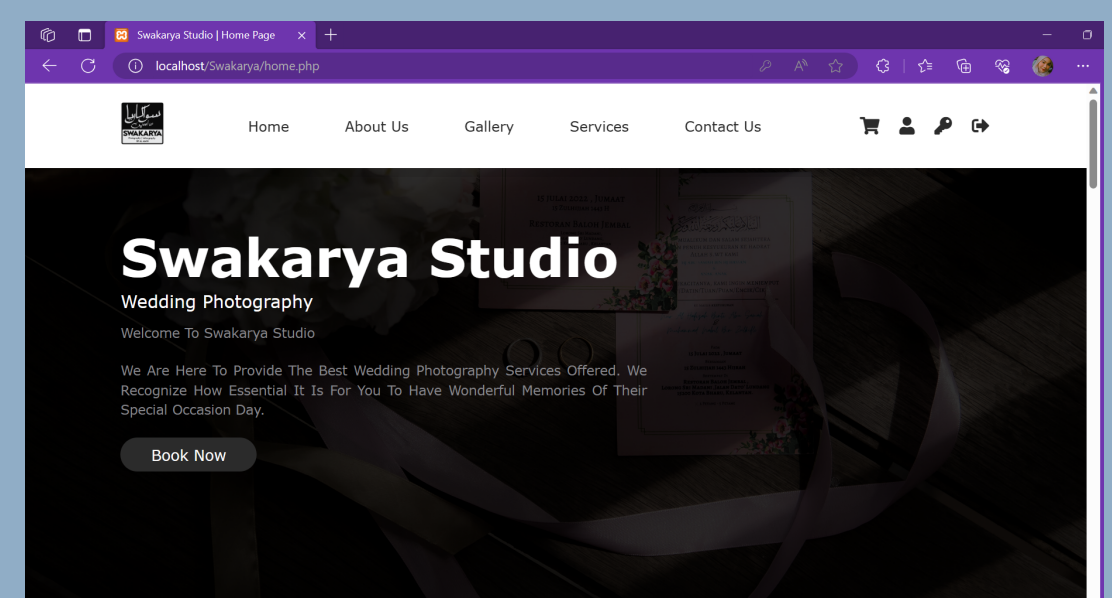

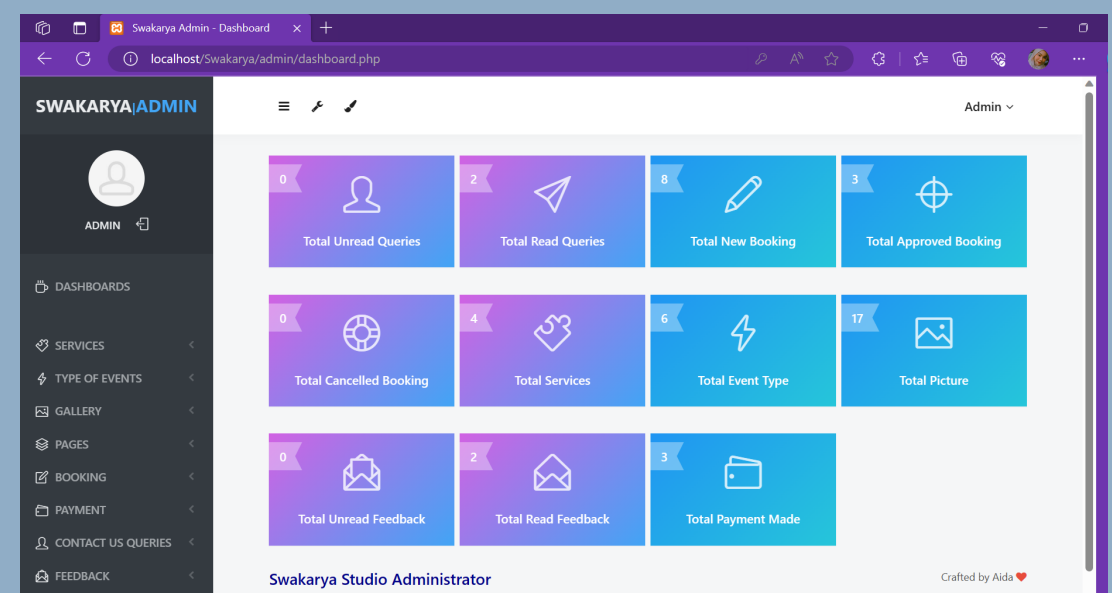

Waterfall Model

SYSTEM ARCHITECTURE
